IT COURSES & PROJECTS

Here are some brief projects completed during my traineeship and more can be found on my portfolio:
https://www.savitripun.co.uk/

Junior Front-End Developer – Graduate   **January 2024 – May 2024**
She Codes ONLINE workshop, Lisbon, Portugal
Developed advanced techniques and tools to improve website responsiveness and ensure seamless performance across multiple platforms, incorporating SEO-friendly practices and leveraging advanced React development to enhance overall user experience.

Project #1: React Weather Forecast App
Description: With an emphasis on the user interface, the **React Weather Forecast Application** was created. Using the app, users may look up the city's daily weather forecast in relation to their specific location. The current min and max temperatures in Celsius are displayed along with a five-day prediction on this app. **Tech Stack**- JavaScript, React, HTML5, CSS3, Remote API
 For more info: https://react-forecast-weather-app2024.netlify.app/

Full-Stack Software Developer- Coding Program Traineeship   **August 2021 – August 2023**
IT Career Switch Ltd, London, UK
Focused on building strong foundational knowledge in both front-end and back-end programming, gained experience with core technologies including JavaScript, C#, PHP, SQL, HTML5, CSS3, and jQuery, developed a solid understanding of how these languages work together to support full-stack development

Project#2: **Company Directory**
Description: The company director is an application designed to operate efficiently on both mobile and desktop devices. The application allows users to interact with a backend server database from a mobile or desktop. The functionality of this application benefits the company and their employees by enabling them to retrieve, create, and modify database entries within the company directory. **Tech Stack**- JavaScript, PHP, HTML5, CSS3, Remote API   F**or more info**:
