SUMMARY

Junior Front-End Developer with a solid foundation in HTML5, CSS3, JavaScript, React.js, PHP, and MySQL. I focus on building clean, responsive, and user-friendly interfaces while continuously improving my problem-solving and debugging skills. I enjoy turning ideas into functional web experiences and writing code that is readable, maintainable, and optimized. I am actively building real-world projects to strengthen my skills and contribute to meaningful, user-focused applications.

WORK EXPERIENCE

Front of House Receptionist **January 2025 - Present**
Sovereign Housing Association Ltd. Basingstoke, Hampshire, UK

- Provide professional customer service and support in a fast-paced environment.

IT COURSES & PROJECTS (Self-Taught + Online Courses)

Here are some brief projects completed during my traineeship and more projects available on my portfolio:
<https://www.savitripun.co.uk/>

Junior Front-End Developer – Graduate
She Codes ONLINE workshop, Lisbon, Portugal

January 2024 – May 2024

Developed advanced techniques and tools to improve website responsiveness and ensure seamless performance across multiple platforms, incorporating SEO-friendly practices and leveraging advanced React development to enhance overall user experience.

Project #1: Weather Forecast App (React)

Description: With an emphasis on the user interface, the **React Weather Forecast Application** was created. Using the app, users may look up the city's daily weather forecast in relation to their specific location. The current min and max temperatures in Celsius are displayed along with a five-day prediction on this app.

Features: API integration, reusable components, error handling, responsive UI

Tech Stack- JavaScript, React, HTML5, CSS3, Remote API

For more info: <https://weatherforecastreactapp.savitripun.co.uk>

Full-Stack Software Developer- Coding Program Traineeship
IT Career Switch Ltd, London, UK

August 2021 – August 2023

Focused on building strong foundational knowledge in both front-end and back-end programming, gained experience with core technologies including JavaScript, C#, PHP, SQL, HTML5, CSS3, and jQuery, developed a solid understanding of how these languages work together to support full-stack development

Project#2: Company Directory

Description: The company director is an application designed to operate efficiently on both mobile and desktop devices. The application allows users to interact with a backend server database from a mobile or desktop. The functionality of this application benefits the company and their employees by enabling them to retrieve, create, and modify database entries within the company directory.

Features: CRUD operations, mobile-friendly UI, backend integration

Tech Stack- JavaScript, PHP, HTML5, CSS3, Remote API **For more info:** <https://www.savitripun.co.uk/companydirectory/>
